

**REVENUES, EXPENDITURES,  
AND DEBT  
OF MINNESOTA COUNTIES**

**FOR THE YEAR ENDED  
DECEMBER 31, 1999**

The Office of the State Auditor is an office created by the state constitution. It serves as a watchdog for Minnesota taxpayers by helping to ensure financial integrity, accountability, and cost-effectiveness in local governments throughout the state.

Through financial, compliance, and special audits, the Office of the State Auditor oversees and ensures that local government funds are used for the purposes intended by law and that local governments hold themselves to the highest standards of financial accountability.

The Office performs approximately 250 financial and compliance audits per year. The State Auditor has oversight responsibilities for over 4,300 local units of government throughout the state. The office maintains seven divisions:

- ! Audit Practice - conducts financial and legal compliance audits for local governments;
- ! Pension Oversight - monitors investment, financial, and actuarial reporting for over 700 public pension funds;
- ! Special Investigations - investigates allegations of misfeasance, malfeasance, and nonfeasance in local government;
- ! Tax Increment Financing (TIF) - promotes compliance and accountability in local governments' use of TIF through financial and compliance audits;
- ! Government Information - collects and analyzes financial information for cities, towns, counties, and special districts;
- ! Legal - provides legal analysis and counsel to the Office and responds to outside inquiries about Minnesota local government law; and
- ! Constitutional - provides senior management for the Office and supports the State Auditor's administrative and official operations.

The State Auditor serves on the State Executive Council, State Board of Investment, Land Exchange board Public Employee's Retirement Association Board, Minnesota Housing Finance Agency, Board of Government Innovation and Cooperation, and Rural Finance Administration Board.

# Scope

This publication is intended to facilitate an understanding of county financial operations by citizens, policy makers and local government officials. The report summarizes, through data tables and charts, the financial operations of Minnesota counties for calendar year 1999.

The data presented in this report is divided into governmental funds and proprietary funds. The governmental funds consist of the General, Special Revenue, Capital Projects, and Debt Service Funds. The financial operations of these funds are summarized in Table 1. Tables 2 and 3 present the data by individual county. Appendix A discusses factors that affect county finances.

The enterprise or proprietary funds of counties are presented separately from the governmental funds. Minnesota counties operate many types of public service enterprises. The enterprises furnish a variety of services and operate wholly or in large part with revenues derived from the sale of goods or services. The financial operations of the municipal public service enterprises are presented in Tables 4 through 8. Footnotes used in the analysis of the enterprise operations are described at the end of the enterprise fund section.

Table 9 lists by individual county the bonded and other long-term debt outstanding as of December 31, 1999. Other long-term debt refers to liabilities such as long-term lease agreements, installment purchase contracts, and notes.

Table 10 presents an analysis of the 1998 and 1999 unreserved fund balances in the General and Special Revenue Funds of counties. The table details the actual unreserved fund balances, the percentage change in unreserved fund balances from 1998 to 1999, and a comparison to 1999 total current expenditures. Appendix B provides a more detailed discussion of fund balances.

To provide additional insight into the relative spending level of counties, the Office of the State Auditor (OSA) publishes a separate report that lists counties based on their per capita expenditures and long-term debt. This report may be obtained by contacting the OSA or by visiting the OSA web site at [www.osa.state.mn.us](http://www.osa.state.mn.us).

In addition to this publication, the Office of the State Auditor maintains an interactive database containing several years of data that can be accessed through the OSA web site. The database allows users to customize the presentation of data to their individual needs. For example, a citizen can select a group of counties to compare, and then choose the years and the categories of revenues and expenditures on which to compare them. The query can then be viewed on screen or saved to a file for downloading. The OSA web site address is [www.osa.state.mn.us](http://www.osa.state.mn.us).

# Overview

## Total Governmental Revenues

In 1999, Minnesota counties raised total governmental revenues of \$3.71 billion to finance county services. This represents an increase of 4.0 percent over the amount raised in 1998.

The funding sources for counties generally vary only slightly from year to year. Over time, there have been some shifts in the composition of revenues. The two largest sources of revenues for counties continue to be taxes and state intergovernmental revenues. However, since 1995, state intergovernmental revenue as a share of total revenues has steadily risen. In 1995, state intergovernmental revenue accounted for 28.2 percent of total revenues compared to 32.9 percent in 1999. Part of the increased share for state intergovernmental revenues is the result of an accounting change. Certain federal human services grants were reclassified as state human services grants. As a result, there has been a corresponding decrease in the share of total revenues derived from federal grants. To further examine five-year trends in revenues, refer to Table 1.

Figure 1 shows the relative shares of total governmental revenues by source. The underlying data for this pie chart is detailed in Table 1.

## Total Governmental Expenditures

Counties provide a variety of services to their citizens. Most services are accounted for in Governmental Funds. The Governmental Funds are made up of the General, Special Revenue, Capital Projects, and Debt Service Funds. In 1999, Minnesota counties expended \$3.95 billion from Governmental Funds to provide county services. This represents an increase of 7.0 percent over 1998 total governmental expenditures.

The relative shares of total governmental expenditures change very little from year to year. However, as the priorities of counties change over time, the relative shares of total spending shift to reflect these new priorities. From 1995 to 1999, public safety and debt service expenditures steadily increased their proportion of county governmental expenditures. Conversely, the expenditure categories of general government, human services, and streets and highways accounted for a smaller proportion of total governmental expenditures. To examine these and other changes over the five-year period, refer to Table 1.

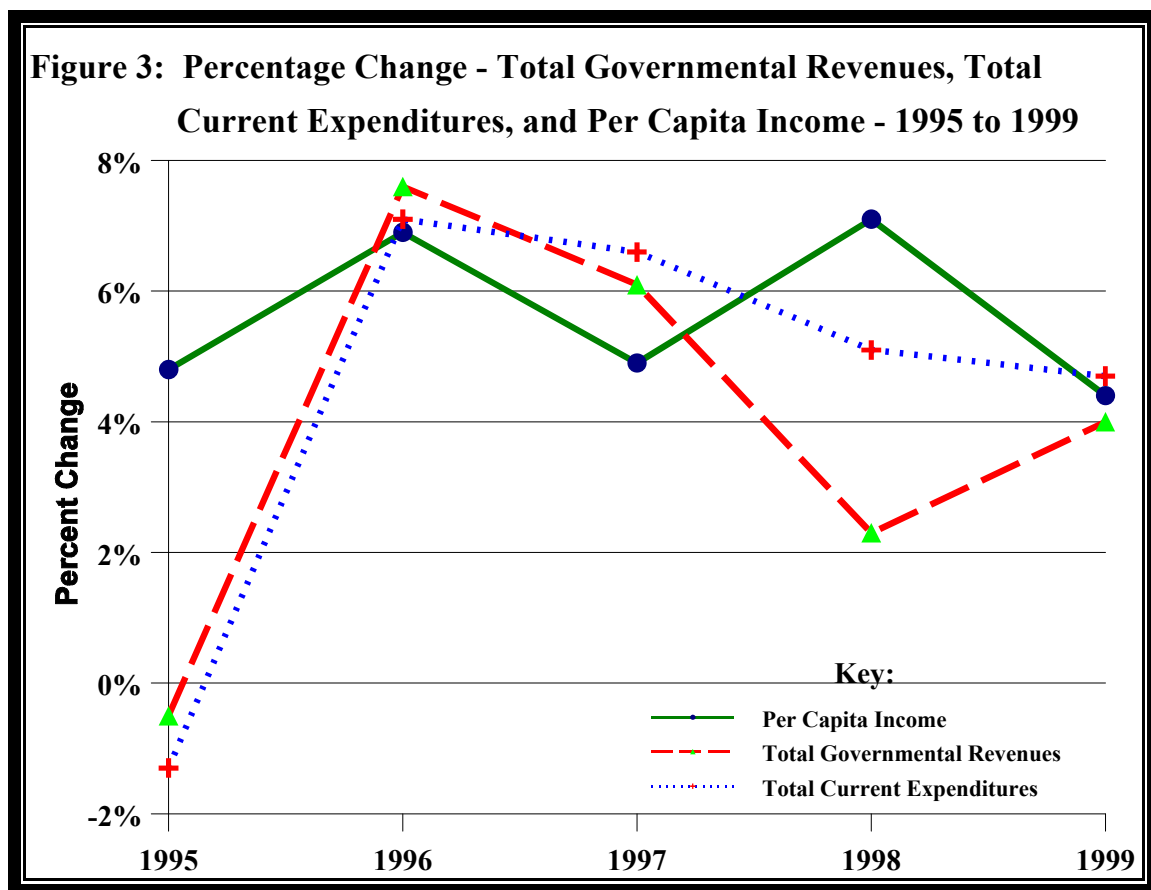

Figure 2 shows the relative shares of total governmental expenditures by function. The underlying data for this pie chart is detailed in Table 1.

## Growth in Government

During the five-year period of 1995 to 1999, total governmental revenues and total current expenditures increased every year except 1995.<sup>1</sup> The rate at which they changed varied from a negative 1.3 percent to 7.6 percent. To place this growth in perspective, Figure 3 below includes a trend line for the growth in per capita personal income for Minnesotans.<sup>2</sup> Per capita income is an indicator of the ability of citizens to pay for governmental spending. When expenditures grow faster than per capita personal income, citizens must spend a greater proportion of their income on governmental services.

Figure 3 compares the growth in total current expenditures and total governmental revenues to the change in Minnesota per capita personal income. Total current expenditures grew faster than per capita income for three of the five years. Per capita income grew faster than total revenues for three of the five years.

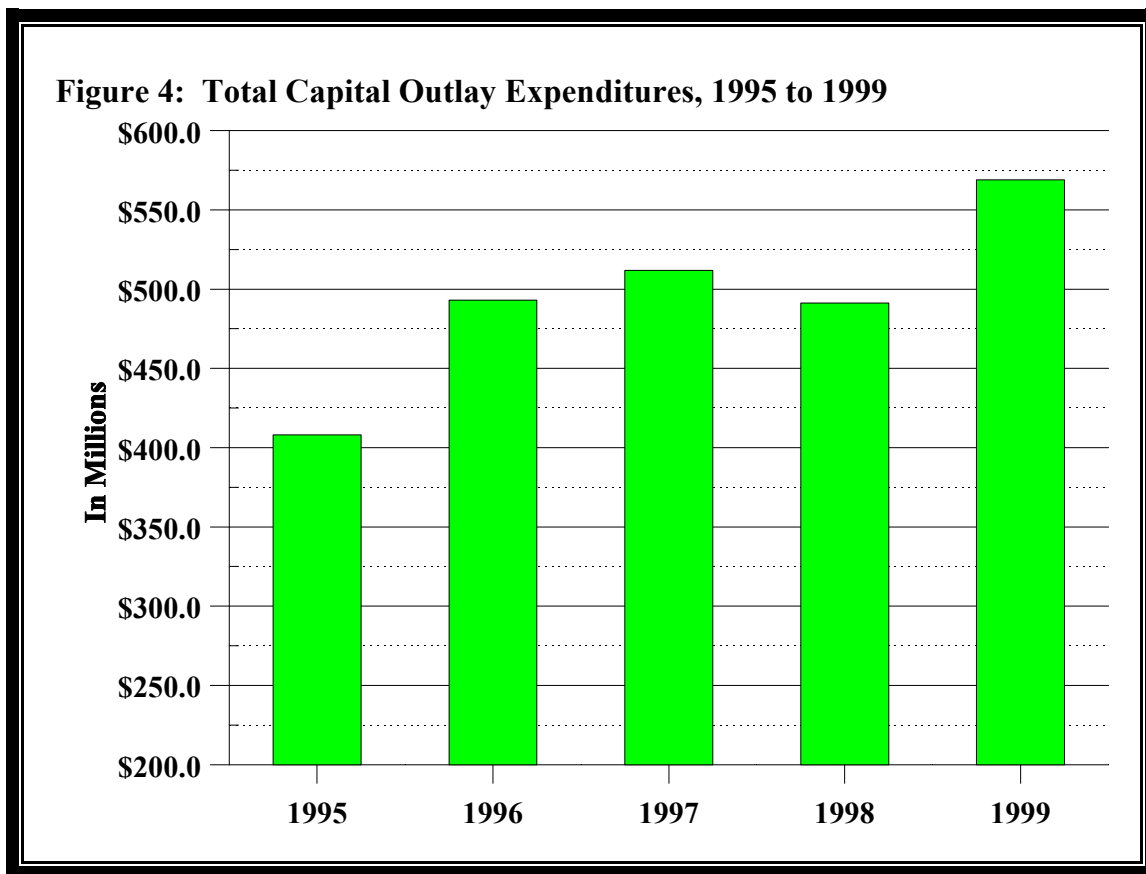

<sup>1</sup> The chart excludes capital outlays as this category is more prone to yearly fluctuations. The chart also excludes revenues derived from borrowing because counties are prohibited from borrowing for current expenditures. Most capital projects are funded through the issuance of bonds or other types of borrowing such as certificates of participation.

<sup>2</sup> Per capita income is calculated by dividing Minnesota total personal income by its total midyear population. The figure is calculated by the Bureau of Economic Analysis which is a part of the U. S. Census Bureau.

## Capital Outlays

Counties expended \$569.0 million on capital investments in 1999. This represents an increase of 15.8 percent over the level expended in 1998. Capital outlays are more likely than current expenditures to vary significantly from one year to the next. The reason for this is that capital projects tend to be large in size but infrequent in nature. Some of the factors that influence the level of capital investments include: the need for infrastructure improvements; public safety concerns; demands for public meeting places and facilities; the need to replace aging infrastructure; and damage to public facilities caused by fire, floods, and storms.

Figure 4 illustrates the trend in capital spending for the years 1995 through 1999.

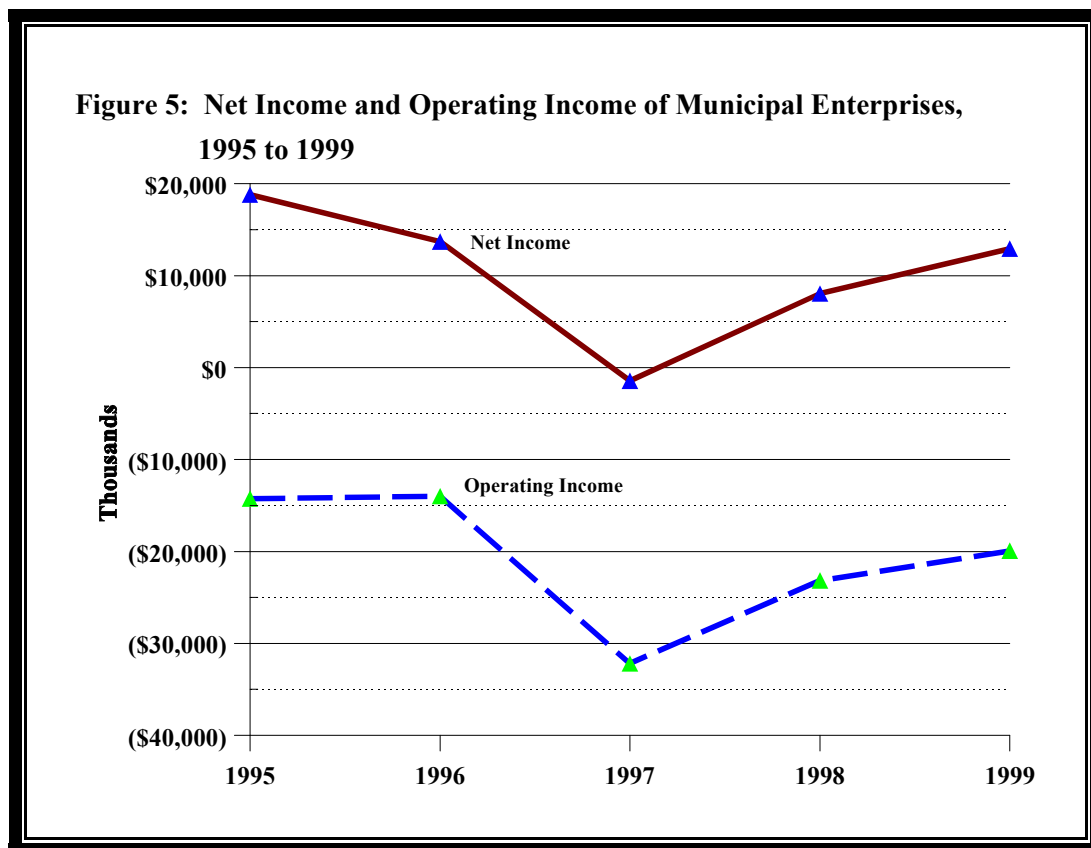

## Public Service Enterprises

In addition to Governmental Funds, many counties establish Enterprise Funds to account for services that are financed and operated in a manner similar to private business enterprises. These enterprises are intended to be self-sustaining through fees and user charges. Although some enterprises generate net income, most have the objective of breaking even. Enterprise Fund accounting is also used to provide more detailed financial information on operations where there are public policy, accountability, management control, and other concerns. The most common enterprises created by counties include hospitals, nursing homes, nursing services, and solid waste. Other enterprises include recreation facilities, housing, and economic development.

Public service enterprises provide a good or service for a charge. Most enterprises are designed to recoup the costs of providing the service through charges to the user. Many county enterprises, however, do not recoup all the costs of the service and need to supplement the operating revenues with transfers from other funds and non-operating revenues such as taxes and intergovernmental revenues. In 1999, the operating losses of county enterprises totaled \$19.9 million. Counties provided transfers and non-operating revenues of \$43.8 million to cover operating losses in county enterprises. After the inclusion of non-operating revenues, county enterprises posted a net income of \$13.0 million in 1999. Tables 4 through 8 provide detailed financial information on Enterprise Fund operations.

Figure 5 examines the five-year trend in the operating income and net income or loss of municipal enterprises. The gap between the operating income line and the net income line shows the amount that counties contributed in the form of non-operating revenues to county enterprises.

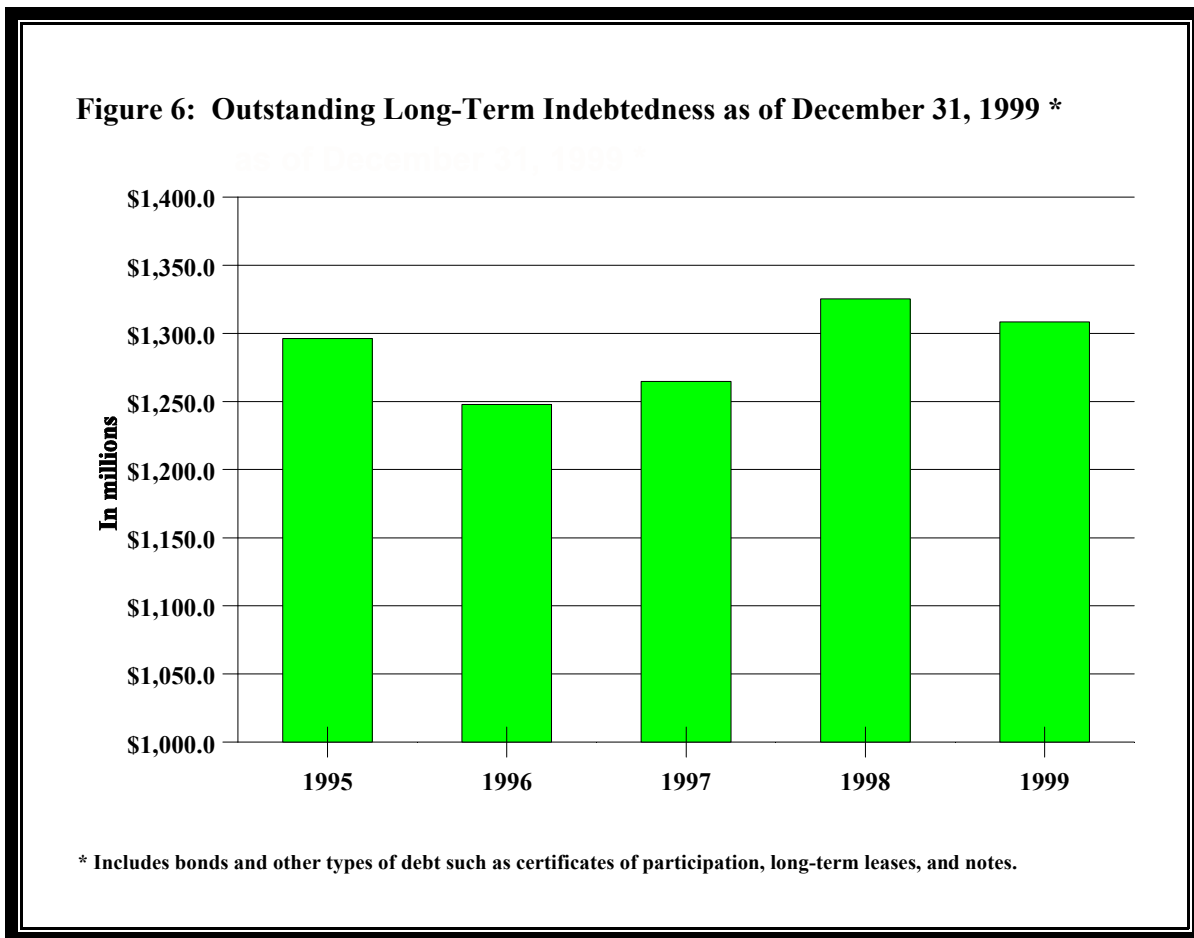

## Outstanding Long-Term Indebtedness

Counties incur long-term debt through the issuance of bonds and notes, certificates of indebtedness, and tax anticipation certificates. Long-term lease agreements are also classified as long-term debt. Counties may only borrow to finance capital projects and purchases. They are restricted by law from borrowing for current expenditures. The amount of outstanding debt affects a county's expenditures because counties must make principal and interest payments to service the debt.

Counties reported a total of \$1.31 billion in outstanding long-term debt at the end of 1999. The most common type of long-term debt is bonds. At the close of the 1999 fiscal year, counties had \$1.06 billion in outstanding bonds and \$253.2 million in other long-term debt. This represented a decrease in long-term debt of 1.3 percent from 1998. Table 9 details outstanding debt by individual county.

Figure 6 shows the five-year trend of outstanding long-term debt for Minnesota counties.

## Unreserved Fund Balances of the General Fund and Special Revenue Funds

Counties maintain cash reserves for several reasons. Counties should have relatively large fund balances at the end of the year because they must rely on them to meet expenditures during the first five months of the next fiscal year until they receive the first property tax and state aid payments. Additional reasons include contingency funds for unforeseen needs and setting aside resources for future capital investments. The unreserved fund balances of counties' General and Special Revenue Funds totaled \$1.42 billion in 1999.<sup>3</sup> This represents an increase of 2.6 percent over the level in 1998.

Comparing counties' unreserved fund balances to their total current expenditures helps put the fund balances in perspective and provides insight on the relative financial health of Minnesota's counties. County unreserved fund balances as a percent of total current expenditures averaged 45.0 percent in 1999. Among individual counties, unreserved fund balances as a percent of total current expenditures ranged from 22.2 percent to 143.4 percent. Figure 7 shows the five-year trend of unreserved fund balances as a percent of total current expenditures.

<sup>3</sup> Although this section discusses only two types of fund balances, Minnesota counties actually report three different classifications of fund balances in the General and Special Revenue Funds. The *unreserved, undesignated fund balances* include all funds remaining at the close of the fiscal year for which no legally-binding commitment has been made, nor has the governing body passed a resolution designating those funds for a specific purpose. The *unreserved, designated fund balances* include all funds remaining at the close of the fiscal year for which no legally-binding commitment has been made; however, these funds have been designated by the governing body for a specific future use. The *reserved fund balances* include all funds remaining at the close of the fiscal year for which there is a legally-binding external commitment of those funds, such as a signed contract for services or equipment.

## **Enterprise Fund Footnotes**

- [1] The hospital is operated jointly by a municipality and the county.
- [2] The nursing home operations are included with the hospital operations.
- [3] The operations are for the fiscal year ended September 30.
- [4] The enterprise fund discontinued operations during the current year.
- [5] The enterprise fund is shown as a component unit in the county financial statements.
- [6] The enterprise fund began operations during the current year.
- [7] The enterprise fund debt was reclassified to the general long-term debt account.
- [8] The enterprise fund operations were reclassified and are shown as a special revenue fund.
- [9] The enterprise fund operations were reclassified and are included with other enterprise funds.
- [10] The enterprise fund operations were previously classified as a governmental fund type.
- [11] The enterprise fund operations were reclassified and are shown as a fiduciary fund.
- [12] The clinic operations are included with hospital operations.
- [13] The operations are for the fiscal year ended June 30.
- [14] The enterprise fund operations were reclassified and are shown as an internal service fund.

## **APPENDIX A**

### **FACTORS INFLUENCING COUNTY FINANCES**

This page left blank intentionally

# Appendix A

## Factors Influencing County Finances

The finances of counties are affected by many different factors. Some of the variation results from decisions made by county officials. Some is due to factors outside the control of the elected officials such as state mandates, a county's size, the economic status of its residents, or the proximity of similar services provided elsewhere. The amount of revenue available may be influenced by rising or falling property values, the use of fee-based services, intergovernmental grants for projects, and many other interrelated factors. Expenditures may be affected by the demographic, geographic, historical or political landscape of the county. Large swings in expenditures may reflect demands caused by extraordinary weather events such as floods and tornados, high levels of snowfall, public safety events such as forest or brush fires, or large-scale investigations of high-profile crimes. Some factors have an on-going effect on county finances, while others might be one-time events.

### A. Demographics

**Age of Housing.** In the metropolitan area, the average age of housing in a county reflects not only the probable condition of the county's infrastructure, but several other conditions as well. The League of Minnesota Cities (LMC) found the average age of housing to be indicative of a variety of characteristics, including a higher relative rate of poverty, more tax exempt property, more subsidized housing, and a declining population base. Each of these factors tends to contribute to a demand for public services.

**Population.** Counties with larger populations face certain challenges not encountered by smaller counties. Simply dealing with large amounts of traffic is one challenge that can become very costly, depending upon the burden carried by an area's streets and highways. Large populations may also indicate high population densities that in turn are associated with higher poverty and crime rates. Conversely, counties with sparse populations spread over large land areas may face higher costs per citizen served and fewer taxpayers to pay for the services.

**Population Decline.** A large loss of population can have a very significant effect upon a county's spending. The costs of a county's infrastructure and many of its services do not go down immediately when a number of county residents move away. Consequently, the county must often curtail services or raise the property taxes on the remaining taxpayers to maintain the existing level of services. Counties experiencing population loss are commonly home to an aging population that is more likely to live on fixed incomes. This population may require more services while at the same time have fewer resources to afford them.

**Income.** Income is indirectly related to a county's ability to raise revenues. Where incomes are lower, property values may also be depressed, reducing a county's tax capacity. Poverty rates, in turn, will be higher, creating greater demand for public services.

**Crime Rate.** Higher crime rates require a correspondingly high level of public safety services. Counties that host entertainment events, such as outdoor concerts, can draw large crowds of nonresidents and create unusual public safety service demands. Higher levels of poverty are also

associated with the crime rate of a county and contribute to an overall greater demand for police protection. In addition to these demands, expenditures can be affected by a number of different factors including: the number, type, and use of personnel; the scope of services; and the amount of shared services.

## **B. Geographic Location**

Different areas of the state often operate within quite different economic environments. Just the presence of one large business or industry can impact an entire region. Declines in industries or companies that dominate local economies may result in a higher demand for public assistance and at the same time reduce the tax capacity of the area. Trends in agriculture may result in lower property values and a decline in revenues for counties in regions where economies are primarily based on agriculture. Counties located in these areas may experience difficulty raising revenues at the same time that they face higher demands for public services.

## **C. Revenue Sources**

**Tax Capacity.** The amount of money any individual or entity spends is directly related to the amount that is available to spend. Likewise, the costs of doing business are directly related to the amounts of revenue that can be generated to meet the costs. The greater the amount and types of revenue available to a county, the more it will spend. Counties with significant amounts of tax-exempt property, such as state and federal parks and forests, churches, and academic institutions, may not receive enough revenue from the parcels to cover the costs of the services provided to them.

**Enterprise Funds.** Services provided through enterprise funds allow counties to pass the costs of services directly onto the users of the services. By using this type of accounting mechanism, counties may be able to keep down the level of general property taxes needed to provide services.

## **D. Shared Services, Joint Powers Agreements**

A significant practice among counties is the sharing of services and the use of joint powers agreements to provide necessary services. "Joint exercise of powers" is defined in Minnesota Statutes § 471.59. Such arrangements allow counties to provide services jointly with other counties and thus pool their resources. For example, certain counties operate joint solid waste facilities while others provide human services through jointly-operated boards.

Shared service arrangements are not necessarily formal; some counties provide services to other jurisdictions on an informal basis. By sharing the costs of services, counties can achieve greater economies of scale and avoid duplicating services and capital investments. Counties that provide a service to a number of entities may show higher expenditures for that service, but will have these costs defrayed by revenues provided by the other participating entities.

## **E. Proximity to Regional or State-Run Programs/Facilities**

Counties that are located near regional or state-run facilities may decide to have their citizens take advantage of those facilities and services rather than provide them on their own. Counties may also take advantage of services offered by county urban centers or neighboring counties.

The degree of isolation experienced by a community, whether geographic or technological (i.e., lack of advanced telecommunications capability), can also affect service demands and costs. Counties that are remote from other communities may not have the opportunity to participate in joint powers arrangements or have access to urban amenities, and thus may need to provide a wider range of services out of their own budgets.

## **F. Source of Labor**

The extent to which a county depends upon other than full-time, salaried employees will affect the levels of expenditures. The following types of arrangements can reduce the full-time complement of staff: extensive use of part-time employees; significant reliance on volunteers; and use of contracts for specific projects or general services. Besides lower wages to part-time employees, an important reduction in costs created through these types of arrangements is in the area of fringe benefits, which are not generally paid to either part-time employees, volunteers, or individuals hired on a contract basis.

Some employee arrangements may increase, rather than reduce costs. Some counties' expenditures are affected by the extensive unionization of their work force. Because of the role of the unions, salary costs may be more difficult to control for these counties.

## **G. Other Factors**

The effects of weather and natural disasters can significantly affect the expenditures for certain services over a period of time. Counties affected by floods and tornadoes may have higher public safety, streets and highways, and other infrastructure costs. During winters in which there is an unusually high snow fall, counties may have increased expenditures for snow removal. There are many other incidental factors not included in this list. Explanations of differences in county expenditures should be pursued with county officials.

# Appendix B

## County General and Special Revenue Unreserved Fund Balances

Minnesota counties report their fund balances at the close of their fiscal year which ends December 31. This creates an impression that counties have excessive amounts of revenue held in reserve. In reality, county fund balances should be relatively large at the end of the year because of local government cash-flow cycles. Counties must rely on their fund balances to meet expenses during the first five months of the next fiscal year, until they receive the first property tax payments (May) and aid payments from the state (July).

Unlike state government, which collects income tax withholding and sales tax receipts regularly throughout the year, many counties do not have a constant flow of revenue from which they are able to fund local government operations. Property tax levies, state aid, and property tax credits comprise the majority of county discretionary revenues. Minnesota laws govern the flow of these major revenue sources into county treasuries.

- ! Counties receive the first half of property taxes from property owners by May 15 of each year.
- ! Counties receive the first half of their state aid and property tax credits from the state on July 20 of each year.
- ! Counties receive the second half of property taxes from property owners by October 15 of each year.
- ! Counties receive the second half of their state aid and property tax credits from the state on December 26 of each year.

Given this state-controlled flow of revenue, county fund balances (which are measured on December 31) are the primary source of funds available to counties for their operating expenses during the first five months of the next fiscal year. An adequate fund balance will provide counties with the cash flow required to finance expenditures and avoid short-term borrowing.

## Unique Circumstances of Each County Determine the Size of Fund Balance

While counties must rely on the fund balances for cash flow purposes during the first five months of a year, the unique circumstances of each county will determine the size of a fund balance that must be maintained to avoid the need for short-term borrowing and to operate effectively.

The unique fiscal characteristics of individual counties make it impossible to apply a single standard for fund balances to all counties. While some counties may require a fund balance equivalent to 40 percent of their total current expenditures, other counties may need a fund balance equal to only 10 percent of their total current expenditures. Numerous factors must be considered when determining the level of reserves necessary to avoid short-term borrowing.

- ! If counties receive relatively large amounts of revenue from sources such as fees, fines, charges for services, other intergovernmental grants and aids, or interest on investments during the first five months of the calendar year, then they will be less dependent on their fund balances for cash flow purposes.
- ! Counties are often able to delay certain purchases until after the initial property tax and state aid payments are received. While payments for employee salaries, wages, and most benefits cannot be delayed during the first five months of the year, purchases of supplies and capital equipment may be delayed.

The individual cash flow needs of a county will determine the minimum fund balance that is necessary for it to operate effectively. Counties may need less reserves in their General and Special Revenue Funds if they have unreserved fund balances in other governmental or proprietary funds from which they may borrow or transfer resources, or if they receive significant revenues from sources other than property taxes and state aid payments (i.e. charges for services). Conversely, counties that rely heavily on property taxes and state aid for the majority of their revenues will need relatively large fund balances to meet their cash flow needs from January 1 through June 1 of every calendar year.

# **GLOSSARY**

## Glossary

**BORROWING** - These revenues reflect the sale of bonds and notes, certificates of indebtedness, and tax anticipation certificates. Counties are restricted by law from borrowing for current expenses.

**CAPITAL OUTLAY** - These expenditures include the purchase, construction, or permanent improvements of buildings, equipment, machinery, and land. Capital outlay varies from year to year based on the needs and resources of the counties.

**CAPITAL PROJECTS FUND** - A fund created to account for the financial resources that are used for the acquisition or construction of a fixed asset.

**CHARGES FOR SERVICES** - These revenues represent user charges paid in exchange for a service, exclusive of revenues from proprietary funds. Examples include sanitation charges, golf fees, court costs, and public safety contracts.

**DEBT SERVICE EXPENDITURES** - These expenditures reflect the annual costs of servicing the outstanding debt of the local government. These costs include principal, interest, and some fiscal charges.

**DEBT SERVICE FUND** - A fund to account for the collection of resources designated to pay the interest, fiscal charges, and principal on long-term debt.

**ENTERPRISE FUND** - A fund established to account for operations financed and operated in a manner similar to private business. Examples include water, sewer, and electric utilities. The expenses of providing services are primarily financed by user charges.

**FINES AND FORFEITS** - These revenues reflect receipts from the payment of penalties for law violations, non-observance of contracts, and forfeited deposits.

**FRANCHISE TAXES** - These revenues reflect proceeds from taxes imposed on public utilities, usually involving elements of a monopoly, (e.g., electric utilities, gas utilities, cable TV) for use of public property.

**GENERAL FUND** - The fund used to account for all financial resources not required to be accounted for in another fund. This fund is the main operating fund.

**GENERAL GOVERNMENT EXPENDITURES** - These expenditures reflect the costs associated with local government functions, such as administration, finance, and elections. Expenditures in this category include salaries, wages, and benefits of legislative, judicial, and administrative personnel, in addition to supplies and building maintenance.

**GOVERNMENTAL FUNDS** - The funds through which most governmental activities are financed. The four governmental fund types are: General, Special Revenue, Debt Service, and Capital Projects.

**GRAVEL TAX** - These revenues are derived from taxes imposed by the local government for aggregate material removal.

**HEALTH** - These expenditures are for the maintenance of vital statistics, restaurant inspection, communicable disease control, and various health services and clinics.

## Glossary

**HRA AND ECONOMIC DEVELOPMENT** - These expenditures are for development and redevelopment activities in blighted or otherwise economically disadvantaged areas. Activities may include low interest loans to individuals and businesses, cleanup of hazardous sites, rehabilitation of substandard housing and other physical facilities, and other assistance to those wanting to provide housing and economic opportunity within a disadvantaged area.

**HUMAN SERVICES** - These expenditures are for activities designed to provide public assistance and institutional care for individuals economically unable to provide essential needs for themselves.

**INTEREST ON INVESTMENTS** - These revenues reflect interest earned on checking and savings accounts, CDs, money market funds, and bonds. This category also includes dividends. In addition, the net increase or decrease in the fair value of investments is recorded here.

**LICENSES AND PERMITS** - These revenues reflect receipts from liquor licenses, cigarette licenses, other business licenses, street use permits, buildings permits, and other non-business licenses and permits.

**MISCELLANEOUS EXPENDITURES** - These expenditures reflect the costs of activities that were not allocated to a specific function. Some activities included in this category are pension and insurance costs not allocated to a specific department.

**MISCELLANEOUS REVENUES** - These revenues refer to refunds, reimbursements, donations, and lease payments.

**NET TAX LEVY** - The net county property taxes, after state property tax relief aids or grants, required to be paid by the property owners of the county.

**OTHER FINANCING SOURCES** - Long-term debt proceeds, sale of fixed assets, and transfers from other funds.

**OTHER FINANCING USES** - Transfers to other funds, refunding bond proceeds deposited with an escrow agent and invested until they are used to pay principal and interest on the old debt at a future time, and remittance to other agencies.

**OUTSTANDING LONG-TERM DEBT** - This category refers to the long-term debt that a local government has incurred to finance its capital projects. Examples of long-term debt include various types of bonds and other obligations, such as notes and long-term leases.

**PARKS AND RECREATION** - These expenditures reflect park maintenance, mowing, planting, and removal of trees. Recreation expenditures include festivals, bands, museums, community centers, baseball fields, organized recreation activities, etc.

**PUBLIC SAFETY EXPENDITURES** - These expenditures reflect the costs related to the protection of persons and property.

**SANITATION** - These expenditures reflect the costs of refuse collection and disposal, recycling, as well as weed and pest control. Some local governments provide sanitation services through enterprise funds.

## Glossary

**SPECIAL ASSESSMENTS** - These revenues refer to levies made against certain properties to defray all or part of the costs of a specific improvement, such as new sewer and water mains, deemed to benefit primarily those properties. The amount includes the penalties and interest paid on the assessments.

**SPECIAL REVENUE FUNDS** - A fund used to account for the proceeds of specific revenue sources that are restricted to expenditures for a specific purpose.

**STREETS AND HIGHWAYS EXPENDITURES** - These expenditures reflect the costs associated with the maintenance and repair of local highways, streets, bridges, and street equipment. Common expenditures include patching, seal coating, and snow removal. Expenditures for road construction are not included in current expenditures but are accounted for as capital outlay.

**TAXABLE TAX CAPACITY** - The tax capacity less the tax increment district value, less the fiscal disparities contribution value, plus the fiscal disparities distribution value.

**TAX CAPACITY** - The value assigned to the property used to calculate the property taxes.

**TAX INCREMENTS** - These revenues refer to the amount of resources local governments generate when they establish tax increment financing (TIF) districts. In a TIF district, the increase in property tax revenues in the redeveloped area are used to pay the costs of development and redevelopment in the district rather than the general services of the county and school district.

**TOTAL CURRENT EXPENDITURES** - This category reflects the total of all expenses relating to current operations.

**TOTAL EXPENDITURES** - This category includes current operating expenses, capital outlays, and debt service principal and interest payments.

**TOTAL REVENUES** - This category reflects all sources of revenue that increase the amount of available resources without creating a liability or a future payment. Borrowing and transfers between funds are not included in total revenues.

**TRANSFERS - ENTERPRISE FUNDS** - The transfer of available resources to or from public service enterprises. It is shown separately because proprietary funds are not included in the governmental funds.

**TRANSFERS - GOVERNMENTAL FUNDS** - The transfer of money between governmental fund types. The revenues and expenditures for these funds are always shown in the same tables.

**UNALLOCATED INSURANCE** - These expenditures refer to insurance premiums that were not allocated to a specific function of government.

**UNALLOCATED PENSION CONTRIBUTIONS** - These expenditures refer to contributions to pension plans that were not allocated to a specific function of government.

## RECENT REPORTS FROM THE OFFICE OF THE STATE AUDITOR GOVERNMENT INFORMATION DIVISION

### ANNUAL REPORTS:

- ! ***An Analysis of Minnesota's Municipal Liquor Store Operations in 1999***  
This annual report details the sales and profits of Minnesota's municipally-owned and operated liquor stores. May 2001
- ! ***Revenues, Expenditures and Debt of Minnesota Cities Over 2,500 in Population December 31, 1999***  
This annual report lists the sources and amounts of revenues, expenditures and outstanding debt for Minnesota cities over 2,500 in population during the most recent year. It also examines enterprise operations and the fund balances for the general and special revenue funds. June 2001
- ! ***Revenues, Expenditures and Debt of Minnesota Cities Under 2,500 in Population December 31, 1998***  
This annual report lists the sources and amounts of revenues, expenditures and outstanding debt for Minnesota cities under 2,500 in population during the most recent year. It also examines enterprise operations. August 2000
- ! ***1999 Local Government Lobbying Expenditures***  
This annual report lists what local governments spend to lobby the Legislature and agencies of the state administration. March 2001
- ! ***2000 Budget Data for Minnesota Counties Together With 1999 Revised Budgets***  
This annual report analyzes the unaudited revenues and expenditures budgeted for 2000 by county. It includes comparisons with 1999 budget data. February 2001
- ! ***2000 Budget Data Together With 1999 Revised Budget Data - Cities Over 2,500 in Population***  
This annual report analyzes the unaudited revenues and expenditures budgeted for 2000 by cities over 2,500 in population. It includes comparisons with 1999 budget data. August 2000
- ! ***2000 Budget Data Together With 1999 Revised Budget Data - Cities Under 2,500 in Population***  
This annual report analyzes the unaudited revenues and expenditures budgeted for 2000 by cities under 2,500 in population. It includes comparisons with 1999 budget data. October 2000
- ! ***Revenues, Expenditures and Debt of the Towns in Minnesota December 31, 1998***  
This annual report lists the sources and amounts of revenues, expenditures and outstanding debt for Minnesota towns for the most recent fiscal year. September 2000
- ! ***Revenues, Expenditures and Debt of Minnesota Counties December 31, 1999***  
This annual report lists the sources and audited amounts of revenues, expenditures and debt for Minnesota counties during the most recent fiscal year. It includes analysis of counties' enterprise operations and the fund balances for the general and special revenue funds. June 2001
- ! ***Legal Costs Survey - July 1998 through June 1999***  
This annual report details the expenditure of public funds for legal services incurred to defend all counties, cities of the first, second, and third class, and school districts with enrollment exceeding 100 students, from lawsuits and amounts paid in voluntary settlements or judgements in any lawsuit. September 2000
- ! ***2000 Criminal Forfeitures in the State of Minnesota***  
This annual report describes the amount of property and cash seized by law enforcement agents in 2000 criminal forfeitures and what happens to the forfeited items. June 2001
- ! ***Ranking of 1999 Per Capita Expenditures of Cities Over 2,500 in Population***  
This annual report compares the per capita expenditures and debt of cities over 2,500 in population. June 2001
- ! ***Ranking of 1999 Per Capita Expenditures and Long-Term Debt - Counties - for the Year Ending December 31, 1999***  
This annual report ranks counties on the 10 current expenditure categories, total capital outlay and total debt service expenditures by both dollar amount and per capita dollar amount. It also ranks counties on outstanding long-term debt by both dollar amount and per capita dollar amount. August 2001
